Jesus Glen Joshua

Computer Science Teacher · Educational Technology · Resume 2026

jesusglenjoshua@gmail.com | +86 131 8111 3174 | Weihai, China | Portfolio: jglenjoshua.github.io/portfolio

PROFILE

Computer Science and ICT teacher with **10+ years of Cambridge-certified teaching** and **12+ years in IT, networking and school systems**. I have led whole-school digital transitions in two countries, and I build the systems that make teachers' work simpler. In the classroom I adapt my teaching so English language learners and learners of every kind can succeed. I care most about using technology to serve people and help students grow in learning and character.

FAITH

My Christian faith drives my commitment to education. I see every classroom, training session and system I build as part of serving God and the people in front of me.

PROFESSIONAL EXPERIENCE

Weihai Zhongshi Foreign School (WZFS), China | May 2025 – Present

May 2025 – Present | **ICT Coordinator & Computing Teacher**

Teaching & curriculum

- Teach **Cambridge IGCSE ICT (0417)** to Grades 8–10 and Computing, Coding and PSHE across Grades 2–7 in a school where most students are English language learners.
- **Introduced Computing to the school for the first time**, building a Grade 2–10 pathway from block coding to text-based programming (Python), and moving the department from ICT towards Computer Science.
- **Enhanced the Computing curriculum for EAL learners**, with core support for written answers (key vocabulary, sentence frames and model answers) that makes their learning more visible, and adaptations so learners of every kind can access the content.
- **Integrated a Bible curriculum into PSHE** for the whole school (using the Go Teach framework) and wrote its scheme of work and curriculum, now used by teachers across grade levels; writing the Computing curriculum guides for the school's ACSI/WASC accreditation.

Making WZFS digital

- **Brought Microsoft 365 for Education to the school.** Microsoft services are hard to set up in China; I worked for six months to get the school verified as an education institution, then set up staff and student accounts, school email, Teams and OneDrive.
- **Created the school's first student ID system.** Before this, students had no IDs and there was no central record outside the learning platform; every student now has an ID linked to their Microsoft account.
- **Built and curated a customised reporting app**, taking report writing from typing by hand to a full system: teachers enter marks, comments and awards in one place, and the app generates printable report cards and award certificates.
- **Working with a committee on Purpose Driven Education (PDE)**, the next stage: students set goals for each subject, teachers add marks, and students and parents can follow progress through the year (in progress).
- **Gave teachers visibility of student work in the ICT lab** (28 workstations). The lab had no student logins, no clear file sharing and no way to monitor work; I set up logins, file sharing, classroom monitoring and scripts to manage every machine, so teachers can now see, send out and collect student work.

Leadership & whole-school

- Helped school leadership see the need for a second Computing teacher, and supported the new teacher's onboarding.
- Work with school leadership to identify infrastructure gaps and plan improvements to technology-integrated teaching across the school.
- Working with colleagues to **establish the school's wellbeing framework** for the ACSI Well-Being domain (health and safety, staff wellness, student wellness).
- **Computing Club**: primary students build games in MakeCode and Minecraft; secondary students work with micro:bit, robotics and app building. **Science Fair mentor** to Grade 9 students designing a five-finger robotic hand.
- Class Co-Advisor, Grade 9 (2026–27); Class Advisor, Grade 7 (2025–26), building trust between school leadership, teachers and Korean families.

Hebron School, Ooty, India | 2015 – March 2025

Feb 2017 – Mar 2025 | **Head of Department, IT & Computer Science**

- Led the Computer Studies department (team of 4) for 5+ years: curriculum, schemes of work, teacher training and department operations.

- Taught Computer Science, IT and ICT at **A Level, IGCSE and O Level**, and KS1–KS4 Computing; introduced A Level IT and Computer Science.
- Integrated the NCCE Computing curriculum with the junior and middle school ICT framework; led a full computer lab upgrade (2023).

2016 – Mar 2025 | **ICT Coordinator & Website Manager**

- **Led Hebron's digital transition**: set up a whole-school virtual learning environment on Google Workspace and Moodle, and chaired the Technology-Enhanced Learning committee (2019–2022).
- **Kept the school teaching through COVID-19 lockdowns**: moved all classes online, ran workshops and trained and supported every member of staff on the new platforms.
- Moved the school website to WordPress, improved hosting, email and network infrastructure, and advised on major network upgrades.

2015 – Mar 2025 | **Class Tutor, PSHE & Hindi Teacher, Photography Club Lead**

- Class Tutor for Standard 9 (2022), Standard 7 (2023) and Standard 11 (2024–25); taught PSHE to Standard 11.
- **Designed a Hindi language curriculum** for Standards 7–9 (2024–25) using Paul Nation's four strands, with differentiated assessments.
- Led the photography club and student photography committee (yearbook and events); System Administrator for the school network (2015–2016).

IBM, Bangalore & DCIS, India | 2013 – 2015

- System Administrator, DCIS (2014–2015): managed servers across multiple data centres and built the IT team's knowledge base.
- Level 2 Server Support, IBM (2013–2014): advanced troubleshooting for enterprise server infrastructure; joined in the final semester of my Master's.

VOLUNTEER TEACHER TRAINING

- **Enhance India teacher-training camps (2022–2024)**: trained teachers in rural Christian schools during school holidays in pedagogy, differentiation and practical digital tools.
- Designing training for teachers with very limited resources shaped how I build curriculum: clear schemes of work, simple structures and practical activities. I used this approach to design Hebron's Hindi curriculum and the PSHE and Bible curriculum at WZFS.
- 2019 – 2021: Sunday School Volunteer, local church: developed and taught children's curriculum.

AP READINESS

- Reviewed the College Board **AP Computer Science Principles** and **AP Computer Science A** frameworks; much of their content builds on what I teach at IGCSE and A Level. Eager to grow into the AP curriculum and College Board practice.

SKILLS

Platforms: Microsoft 365 (setup and administration, Teams, SharePoint, OneDrive), Google Workspace for Education, Moodle, WordPress · **Teaching:** EAL writing support, differentiation, MakeCode, micro:bit, Python · **Systems:** school data and reporting workflows, web app development, networking, server and lab administration

PROFESSIONAL DEVELOPMENT & QUALIFICATIONS

- 2025: **Google Certified Trainer**; Generative AI for Educators (Google)
- 2022: Marking Workshop, Cambridge AS & A Level IT
- 2020: **Cambridge International Diploma in Teaching and Learning**
- 2019: Certificate in Mentoring (Cambridge International Education)
- 2017: Cambridge International Certificate in Teaching and Learning (Distinction)
- 2011–2013: **Master's in Networking Technology**, Karunya University, Coimbatore
- 2008–2011: Bachelor of Computer Science, Bishop Appasamy College, Coimbatore; BA in Hindi, Dakshin Bharat Hindi Prachar Sabha
